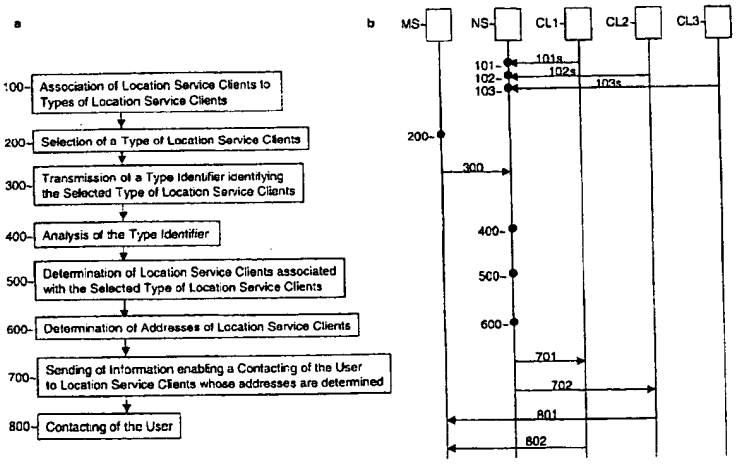
(54) Title: METHOD FOR ENABLING A LOCATION SERVICE CLIENT TO CONTACT A USER OF A MOBILE DEVICE



(57) Abstract: A method for sending (700) information enabling a contacting of a user of a mobile device (MS) to at least one location service client (CL1,CL2) is disclosed. The method comprises the steps of selection (200) of a type of location service clients on the mobile device (MS), transmission (300) of a type identifier from the mobile device (MS) to a server (NS) in a telecommunication system, the type identifier identifying the selected type of location service clients, analysis (400) of the type identifier for a determination (500) of one or more location service clients (CL1,CL2) associated (100) with the selected type of location service clients, determination (600) of at least one address of the one or more determined location service clients (CL1,CL2) according to a result of the analysis (400), and sending (700) information enabling the contacting of the user to the one or more location service clients (CL1,CL2) whose addresses are determined.
